History of Cake

The history of cake dates back to ancient times, with early versions made from grains, honey, and fruits. The modern cake evolved in Europe during the 17th century, with the introduction of refined sugar and new baking techniques. In the 18th and 19th centuries, cakes became more elaborate with the invention of baking powder and the rise of bakeries. Today, cakes are a beloved treat worldwide, enjoyed in various styles and flavors for every occasion.
